- 1 oz. Color Gels Oils 8MO
- 2oz. 10 vol. Pro-oxide Cream Developer

GLOBAL GLAZE FORMULA

- 1oz. Shades EQ Bonder Inside 010AG
- 1/2 oz. Shades EQ Bonder Inside 09NB
- 1/2 oz. Shades EQ Crystal Clear 000
- 2 oz. Shades EQ Processing Solution

REVERSE BALAYAGE FORMULA

- 1 oz. Color Gels Oils 9N
- 1/2 oz. Color Gels Oils 9NCh
- 1/2 oz. Color Gels Oils Clear
- 2 oz. 10 vol. Pro-oxide Cream Developer

SECTIONING

+ STEP 1

Follow the natural part and separate the front from the back with a vertical parting from the high point of the head to the top of the ear.

Repeat on the opposite side.

+ STEP 2

Divide the back equally with a vertical parting from the high point of the head parting to the center of the nape.

Secure 4 quadrants.

+ STEP 3

Process for 20-45 minutes based on developer choice, rinse, shampoo and condition with **Acidic Color Gloss**. Dry the hair.

+ STEP 4

Starting in the back right quadrant and working from bottom to top, apply Global Glaze Formula from Zone 1 through Zone 3. Repeat on opposite side and front two quadrants. Process for 20 minutes.

+ STEP 5

Rinse and shampoo with **Acidic Color Gloss**, then treat with **Acidic Bonding Concentrate 5 Min Leave-In Treatment**. Dry and style hair.

APPLICATION

+ STEP 1

Begin by applying Zone 1 Formula to the first 1"-1.5" of the front right quadrant. Take diagonal back sub sections as you work. Work from top to bottom and repeat on opposite front side. After that side is complete, repeat in back.

+ STEP 2

Starting in the front right quadrant, take a small triangle section at the bottom of the section near the ear, and apply a small amount of the Reverse Balayage Formula to the top of your section. Using your hands, work the formula from, Zone 1 down into Zone 2. Continue taking wider triangles as you work up the head, stopping right above the parietal ridge/front side section. Repeat on opposite side and back.
