

LastPass... |

POWERFUL ENOUGH FOR IT, BUILT FOR THE REST OF US.

LastPass Teams includes:

- **Sharing:** Whether sharing just one website or dozens at a time, LastPass has the flexible options that teams need.
- **Dashboard:** A simple, intuitive dashboard where team leads can add or remove team members, update access permissions, set policies and more.
- **Policies:** With security policies, team leads can set password strength requirements, require multifactor authentication, login rules, and more.
- **Unlimited sync:** Automatically propagate password changes and policies behind-the-scenes so everyone is up-to-date, no matter which device they're using.
- **Customer support:** Ask LastPass experts your questions via email and they'll respond to you quickly so your team is always productive.

LastPass Teams lets you bring the convenience and security of LastPass to your office. We built it for business owners, team leads, and everyday users like you, so you can be confident in solving your team's password problems, without needing to be an IT admin.

Team-wide Sharing

Whether sharing just one account login or dozens at a time, with one colleague or a group, team password sharing is quick, convenient, and secure.

Convenient Access

Team members always have their passwords, no matter where they're working – in the office, at home, or on the road.

Admin Oversight

You don't have to be in IT to enable simple, secure password management. Team leads can invite and remove team members, control access, and report on activity.
